## **GHG Policy**

### **Policy statement**

SCL is committed to decrease the energy and GHG (Greenhouse Gas) emissions footprint. We strive to improve energy efficiency in all our operations and production of renewable energy shall effectively decrease the GHG emissions.

### **Policy**

1. Monitoring Energy use and GHG emissions
2. Ensure that staff, customers, and suppliers are made aware of our GHG Management policy and encourage and motivate them to conserve energy.
3. Implementing Innovative Technology in our process equipment through replacing or modifying old equipment with more energy efficiency,
4. Process Optimization to achieve equal or greater outputs with lower energy inputs.
5. Opt for clean/ Renewable power when purchasing / generating energy sources to lower GHG emissions.
6. SCL ensure to increase Purchase of Green/Renewable energy share in their future operations.
7. Look for an alternative way to neutralize the carbon footprint is through carbon offsetting.
8. Scope 1 & 2 emission monitoring to be done on regular basis. Committed to 30% intensity reduction by FY 2030.
9. This GHG management policy will be reviewed as and when required and updated to take into account changing business circumstances and ensure that it provides opportunities for improvement.
