Waste Management Policy

Policy statement

SCL committed to circular economy by incorporating principles of reducing reusing and recycling waste in our entire life cycle of manufacturing facilities

Policy

1. Identify potential waste streams and segregate the same.
2. Evaluate the reuse and recycling program in our life cycle of the product.
3. Ensure to reduce and reuse of the waste in our manufacturing operations.
4. Consider waste collection strategies for effective segregation and storage orientation.
5. Monitoring Energy use and GHG emissions.
6. Ensure that staff, customers and suppliers are made aware of our GHG Management policy and encourage and motivate to conserve energy.
7. Implementing Innovative Technology in our process equipment through replacing or modifying old equipment with more energy efficient,
8. Process optimization to achieve equal or greater outputs with lower energy inputs.
9. Opting for clean/ Renewable power when purchasing energy sources to lower GHG emissions.
10. SCL ensures to increase Purchase of Green/Renewable energy share for their future operations.
11. Validate waste management data by engaging third party data assuring agencies and communicate the same to all its stakeholders.
12. Waste management policy will be reviewed as and when required and updated to take into account changing business circumstances and ensure that it provides opportunities for improvement.
